Birinyi Stock Ratings: Explanation of Terms

The new Birinyi Stock Ratings service is a proprietary stock scoring system that we have developed using technical, fundamental, sentiment, relative strength, and money flow analysis. The scoring system grades over 1,500 stocks and identifies those which are the most and least attractive by combining multiple Birinyi stock research methods. The ratings are meant to highlight stocks which are most attractive in the short-term. All stocks included in the "Birinyi 50" are rated at least neutral in terms of money flows, but are not necessarily under accumulation.

Updated weekly, the Birinyi 50 highlights the top 50 ranked stocks based on our in-depth analysis. In order to allow our subscribers to search for stocks in which they have a specific interest, the Birinyi Stock Ratings product provides an interactive database for users to find the Birinyi Rating for any of the 1,500 stocks that we cover.

Explanation of Terms

Category	Description
Rank	Numerical ranking on a scale of one to ten (with ten being the best) of each stock's total score vs. all the stocks in the S&P 1500.
Ticker Name	Ticker symbol for each individual stock.
Industry	Company name.
Index	GICS classification code for the industry each group falls into.
Price (Today)	Index each stock belongs to (Small Cap, Mid Cap, or Large Cap).
Price (Week Ago)	Most recent price.
Fundamental Score	Price one week ago.
Technical Score	Each stock is ranked on a variety of measures ranging from earnings growth, revenue growth, valuation, and return on assets and equity vs its peers.
Relative Strength	Looks for stocks in general uptrends. Stocks which score high on this criteria are currently above their short and intermediate-term moving averages, are near their one year highs, and have positive price to volume trends.
Sentiment	Measures each stock's performance vs. the market and its peers over the last one, three, six, and twelve months.
Total Score	Gauges how different market participants feel towards a given stock. Information analyzed includes intraday trading, institutional holdings, analyst estimates, and money flows.
	A Weighted average of each stock's Fundamental, Technical, Relative Strength, and Sentiment Score.
